Measure what matters

One connected learning story

Navy+ brings skills-based MTSS data and standards-level classroom insight together in one platform, helping educators see where students are, what they need, and how to respond with greater confidence.

By connecting screening, progress monitoring, and classroom formative data, Navy+ makes it easier to spot patterns, personalize support, and follow growth over time, without jumping between systems or piecing together disconnected reports.

AI research that empowers every learner

ETS Research Institute advances responsible AI research in learning, education and assessment.

We're applying decades of measurement science expertise to ensure AI-powered learning and measurement solutions are valid, equitable, fair and transparent. ETS Research Institute promotes the responsible use of AI by conducting rigorous research, creating practical tools and setting meaningful standards.

Learn more about our research on AI for assessment capabilities

Discover our AI research expertise at NCME AIME 2026:

- Validating AI-simulated students to draw conclusions about teacher practice
- Testing AI-generated reply consistency across model changes
- Promoting individual-level fairness in automated scoring — and reporting the accuracy tradeoff
- Verifying that AI-personalized math problems remain mathematically equivalent to standard items
- Documenting how AI-generated reading items can match statistics yet require different inferences
